

STANDING WATER/MOSQUITO SOURCE REPORT

Date: 7/21/06

Location (address, nearest intersection, write down as precise a description as possible to enable the Sacramento-Yolo Mosquito and Vector Control District to find the source): Road 29 west of Pole Line (road 102) on the north side

Type of Mosquito breeding threat to report (check off one or more):

Ruts or trenches X

Describe size of standing water problem in inches or feet (e.g. 9"X14") 3 ft x 100 ft or more

Is there an obvious source for the standing water (if yes, describe) looks like an irrigation ditch with irrigation halted

Once this form has been filled out the information should be passed on to the Sacramento-Yolo Mosquito and Vector Control District (SYMVCD). This information can be given to the SYMVCD by telephone 1-800-429-1022 or the form can be faxed to the SYMVCD at (916) 685-5464.

So a record of all reports to the SYMVCD can be compiled please send a brief email to dbmooney@dcn.org so this report can be posted on the stopwestnilesprayingnow.org website. These reports will be considered active until their status is confirmed from the SYMVCD (treated, remediated or unresolved) which will then be noted on the website.
